摘要

-Designs and provides oversight of clinical research programs. Builds relationships with key opinion leaders and applies their input to enhance study design and protocols. Serves as medical/scientific consultant to marketing or research project teams and government regulatory agencies. Establishes the criterion essential for determining the safety, efficacy, and medical utilities. Interprets results of Phase I-III investigations in preparation for new-drug or medical device application. May serve as safety expert for individual clinical projects. May be responsible for post marketing studies

About the Role

Are you ready to make a significant impact in the field of renal research? We have an exceptional opportunity for a Senior/Global Program Clinical Head - Renal at Novartis. Join our ambitious team and contribute to groundbreaking research that will shape the future of healthcare.

Responsibilities:

- Lead and manage the clinical program for renal research, ensuring flawless execution of clinical trials and studies.
- Collaborate with cross-functional teams to determine and implement the clinical development strategy for renal programs.
- Oversee the design, planning, and conduct of clinical trials, ensuring they are conducted in compliance with applicable regulations and guidelines.
- Analyze and interpret data from clinical trials, and effectively communicate the findings to both internal and external parties.
- Provide expert input and guidance on renal research, contributing to the overall scientific and strategic direction of the program.
- Build and maintain strong relationships with key opinion leaders and external partners in the renal research community.
- Stay up-to-date with the latest advancements and scientific literature in the field of renal research, actively contributing to the knowledge base within the organization.

Requirements:

- MD or equivalent (preferred), PhD, or PharmD degree required, specialization in a subspecialty may be needed.
Advanced clinical training/knowledge in disease area (renal) preferred with 6 years (MD or equivalent)
 - 10 years (PhD or PharmD) of involvement in clinical research or drug development in an industry environment spanning clinical activities in Phases I through III/IV, including submission dossiers
- A proven track record of successfully leading and managing clinical programs in the field of renal research.
- Extensive experience in designing and conducting clinical trials, with a deep understanding of regulatory requirements and guidelines.
- Strong scientific background in renal research, with a PhD or equivalent degree in a related field, or equivalent experience.
- Excellent communication and presentation skills, with the ability to effectively communicate complex scientific concepts to both scientific and non-scientific audiences.
- Exceptional organizational and project management skills, with the ability to prioritize and manage multiple tasks simultaneously.
- Strong teamwork and collaboration skills to effectively work with individuals from diverse departments.
- Flexibility and adaptability to work in a fast-paced and dynamic research environment.

Come join Novartis and become a member of a team that is committed to pushing the boundaries of healthcare through innovative research.
