摘要

Work Location: Castellanos de Moriscos (Salamanca).

At Advanced Accelerator Applications Molecular Imaging, we develop, manufacture and supply radiopharmaceutical products for positron emission tomography (PET) imaging - a cornerstone of personalized medicine. Our core mission is to provide precision diagnostic solutions, with a primary focus on oncology. Novel PET probes are designed to target specific tumor markers, revolutionizing the way we diagnose and treat cancer. Join us in our mission!

The Production Technician ensures the correct procedure of radiopharmaceutical production with high standards of GMP, HSE, environmental protection and good working practices.

About the Role

Availability to work on shifts is required.

Major accountabilities:

- User-level cyclotron management and production of radiopharmaceuticals.
- Preparation of kits and/or synthesis reagents in the manufacture of radiopharmaceuticals.
- Cleaning, disinfection and preparation of the synthesis cells, dispensing cells and laminar flow cabin.
- Collaborate in the implementation and revalidation of production processes and coordinate the correct manufacturing standards applied to the production of radiopharmaceuticals.
- Help to ensure the clean room cleanliness, cabinets and refrigerators, as well as the type A packages and assist QC responsible in the management of raw material stocks and production materials.
- Under the coordination of the production manager, performs the necessary activities for the correct execution of the various activities in production.

Obligatory requirements:

- Advocational training, ideally in Laboratory / Degree in Laboratory
- Open and clear collaboration and communication to make sure the daily operation runs smoothly
- Reliable, present and able to transmit the energy necessary to continue an improvement process and consolidate the system
- Fluent Spanish, intermediate knowledge of English

We offer a market-competitive base salary in line with your qualification, experience and individual proficiencies, learning & development options and worldwide career opportunities within a growing multinational pharma company that develops a job with direct impact on cancer patients.

Why Advanced Accelerator Applications?

Thousands of people die of cancer around the world every day. At Advanced Accelerator Applications, a Novartis company, our mission is to transform lives through radioligand therapy in nuclear medicine to fight several leading types of cancer. How will we continue to be on the cutting edge of medicine?

We believe new groundbreaking solutions can be found at the intersection of medical science and digital innovation. That a diverse, equitable and inclusive environment inspires new ways of working. We believe our potential can thrive and grow in an unbossed culture underpinned by integrity, curiosity and flexibility. And we can reinvent what's possible, when we collaborate with courage to aggressively and ambitiously tackle the world's toughest medical challenges. Because the greatest risk in life, is the risk of never trying!
