摘要

Novartis operates multiple manufacturing sites globally to produce cutting-edge Cell and Gene Therapy products and Biologics (Large Molecules).

As a Discoverant Specialist, you will play a pivotal role in supporting the Discoverant System Business Owner within Novartis Technical Operations (NTO). Discoverant is a validated IT solution utilized across NTO for automated manufacturing data aggregation, advanced analysis, and comprehensive reporting.

In this role, you will act as the global Discoverant Super User, collaborating with IT teams, manufacturing sites, and the Discoverant Global Business Owner. Your responsibilities will include ensuring optimal system setup, seamless change implementations, and ongoing maintenance of the Discoverant platform across the Novartis network.

About the Role

Major Accountabilities

- Serve as the primary business-side representative for the implementation, lifecycle management, and ongoing evolution of the Discoverant system, ensuring effective collaboration with local users, IT, and system vendors under the guidance of the business owner.
- Coordinate Discoverant interfaces with integrated IT systems, including ERP (SAP), MES, LIMS, Data Historians, and patient scheduling tools (e.g., CellChain), leveraging cloud-based manufacturing and quality data storage solutions.
- Facilitate onboarding for new internal and external users, conduct training sessions, and promote knowledge sharing among end users.
- Develop and optimize data analytics components, including dashboards, control charts, automated reports, and advanced analytics, utilizing best practices and tools like Pipeline Pilot.
- Drive change control processes for the Discoverant system, integrating new parameters, products, and architectural updates, including respective interface modifications, while supporting local and global risk and impact assessments.
- Support data integration from new systems and parameters into Discoverant to meet manufacturing data trending and analysis needs, aligning data flow from source systems to Discoverant and advanced analytics platforms.
- Assess data quality, implement corrective actions, and propose improvements to ensure data accuracy and reliability.
- Manage manufacturing data provision for internal stakeholders outside the manufacturing group.
- Address and resolve Discoverant-related deviations, quality events, and associated actions.
- Act as a liaison between local Discoverant users, IT teams, and system vendors to ensure smooth operations and system enhancements.
- Author and maintain Discoverant-specific Standard Operating Procedures (SOPs) and Working Procedures (WPs).

Key Performance Indicators (Indicate how performance for this role will be measured)

- Quality / Accuracy / Right First Time
- Timeliness
- Deviations / Escalations
