India

摘要

Location: Hyderabad

Role involves designing, developing, and maintaining data pipelines to support analytics and reporting requirements. Responsibilities include collaborating with cross-functional teams to gather data requirements, optimize data models, and ensure data quality. The ideal candidate should have strong Database SQL and PQL skills, experience with cloud-based data technologies, and a background in data engineering or a related field

About the Role

Major accountabilities:

- Designing and implementing data pipelines to extract, transform, and load data from various sources into Celonis for analysis.

- Collaborating with business teams, business analysts, and other stakeholders to understand their data requirements and ensure data is delivered accurately and efficiently.
- Monitoring and maintaining data quality, performance, and integrity within the Celonis platform to support effective decision-making and business processes
- Contribute enterprise grade and state of the art Solution Design and Architecture with maximizing re-usability, configurability and scalability.
- Ensure top class and state of the art engineering delivery, code management, automation and strive for highest efficiency.
- Ensure the overall user experience is taken into account when designing deploying new solutions and services.
- Ensure adherence to Security and Compliance policies and procedures as well as with other Novartis guidelines and standards.
- Deliver as per agreed timelines and budget. Effectively engage with the chosen SI Partner(s) and collaboratively strive to deliver business value

Minimum Requirements:

Work Experience:

- At least 7+ years of experience in Data bases, data integration and data modeling.
- Min 2 yrs of experience in Celonis process mining
- Ability to lead teams and drive completion of projects as per business requirements
- Working in multi-national context and across countries.
- Experience in managing celonis platform, optimization of APC consumption
- Celonis process mining, Data bases, PQL, SQL, Data Modeling, Data Integration
- Business Partnering, Change Management, IT Service Delivery and Performance Management.
