

## Postdoc in Bioanalytics

Job ID  
REQ-10046245

4月 01, 2025

Switzerland

### 摘要

We are looking for a postdoctoral fellow to join the Analytical Development / Bioanalytics (AD-BA) team in Basel, within the Novartis Technical Research and Development (TRD) Biologics Analytical Development unit.

### About the Role

The successful applicant will be part of a bioassay team working in a highly collaborative and scientific environment focusing on the development of assays and evaluation of pharmacokinetic properties of novel biologics entities.

Preferred start date: 1st of July 2025

Duration: 2 years

Please attach a cover letter explaining your motivation for this position and let us know when you are available. Thank you very much.

Please note that we can only accept applicants who are eligible to work in Switzerland or have completed their studies at a Swiss University

Your responsibilities:

- Development and implementation of cell-based methods for characterization of therapeutic protein and antibodies
- Method qualification and assessment of method robustness, where applicable
- Preparation of modified therapeutic proteins and antibodies for characterization
- Documentation of experiments and results in electronic systems
- Participation in interdisciplinary meetings, scientific presentation of results
- Organizational work and exchange of information, materials and data with other departments

What you 'll bring to the role:

- Education: PhD in Biotechnology, Biochemistry, Biology or related field. Relevant work experience would be an asset.
- Languages: Strong communication skills in English; proficiency in German or French would be an asset
- Experience/Professional requirements:
  - Hands-on experience on developing cell-based methods
  - Previous experience working with cell-based binding assays and transcytosis assays would be an asset
  - Strong theoretical knowledge of protein biochemistry and posttranslational modifications
  - Hands-on experience in protein sample preparation and analysis
  - Theoretical knowledge or experience of pharmacokinetics would be an asset

Why Novartis?

Helping people with disease and their families takes more than innovative science. It takes a community of smart, passionate people like you. Collaborating, supporting and inspiring each other. Combining to achieve breakthroughs that change patients' lives. Ready to create a brighter future together?
