Slovenia

摘要

Location: Ljubljana, Slovenia #LI-Hybrid

Senior Life Cycle Program Manager leads the coordination and administration of all aspects of an ongoing program of related Life Cycle Projects and is accountable to lead, plan and organize program activities and to establish priorities within the program to achieve strategic objectives, in accordance with legislation, internal rules, good practices and business objectives.

We are seeking key talent, like you, to join us and help give people with disease and their families a brighter future to look forward to.

Apply today and welcome to where we thrive together!

About the Role

Key Responsibilities:

- Lead the brand program in cross-functional project teams led from global / regional functions, e.g. Product Launches, Program Management Teams to ensure the coordination of all activities at brand level.
- Support and lead local and/or global cross-functional project teams, to ensure time to market / implementation of all on-going life-cycle activities.
- Drive the Evaluation, and define the scope and objectives of projects.
- Support preparation of business cases incl. financial evaluation (ROI, NPV), provide - reports/updates, to facilitate Management decision-making on life cycle activities.
- Managing of the cross-functional project teams to deliver on brand strategies.
- Support the project leads to define and establish the submission and implementation strategy with all responsible stakeholders (e.g. Regulatory, Planning) during initiation phase in alignment with the NTO strategy.
- As part of the submission and implementation strategy support the agreement on the change request strategy and ensure that the project related change requests in the corresponding change control system are maintained in an adequate status as required by the processes.
- Support the project leads to define and establish the master data strategy during initiation phase together with MDG / LCI to ensure an early master data modelling for all Life Cycle Projects.

Essential Requirements:

- University degree in natural sciences, engineering or economics.
- Minimum 5 -10 years of work experience in pharmaceutical industry, in the field of supply / production / quality assurance / technical development and some years of experience in project management.
- Superior knowledge about Supply Chain LCM processes
- Experience in Supply Chain Management in Pharmaceutical Industry
- Extensive Project Management experience
- Intercultural experience and ability to act in a complex and rapidly changing business environment

We offer a permanent employment, with 6 months of probation period.

You are kindly invited to submit your application in English language, including CV.
